Sebastian Aguirre

Full Stack & Mobile Engineer

Boston, MA • osebas15@gmail.com • github.com/osebas15 • linkedin.com/in/sebastian-aguirre-52ba93aa

SUMMARY

Full stack engineer with 10+ years of experience building iOS, web, and enterprise software for startups and Fortune 500 brands. I take a feature from idea to shipped work on my own, with a strong focus on quality: I've replatformed consumer apps used by millions of people daily, caught and fixed security issues before they reached users, and set up AI-assisted development practices (Claude, LLM coding workflows) that help teams ship faster. I communicate clearly with stakeholders, pick up new tools quickly, and choose the right solution for each client.

TECHNICAL SKILLS

Languages	Swift, TypeScript, JavaScript, C#, Objective-C, SQL
Mobile	SwiftUI, SwiftData, UIKit, React Native, Capacitor.js — iOS, iPadOS, watchOS, Android
Web / Cloud	React, Node.js, ASP.NET, AWS, Azure, Firebase
AI	Claude skills & agentic coding workflows, LLM-assisted development, ChatGPT apps & connectors
Tools	Git, GitHub Actions, Bitrise, Azure Pipelines, Jira

EXPERIENCE

TELUS Digital — Boston, MA

Sep 2025 – Oct 2026

Full Stack Engineer — consulting for enterprise media and hospitality clients

Wyndham Hotels & Resorts

- Replatformed a native mobile app used by millions of people daily to React Native.
- Built a set of Claude skills that let the team iterate on bug fixes and new features much faster.
- Tracked down a memory leak and cut memory growth by about 40%.
- Helped reach a 95% UAT bug closure rate ahead of a hard release deadline.

News Corp / Dow Jones

- Worked on a lean AI team to prototype the Dow Jones ChatGPT connector.
- Found and fixed a critical security flaw in the MarketWatch ChatGPT app before handoff.

McClatchy

- Maintained a white-label news app that powers many local newspaper brands.
- Helped set up the team's LLM-assisted coding practices, improving development speed and code quality.

LogixHealth — Bedford, MA (contract)

Aug 2023 – Nov 2023

Mobile Applications Engineer — helped launch a new mobile development business unit

- Helped leadership set up the iOS business unit and led stakeholder meetings to define the product roadmap.
- Quickly prototyped iPhone and Apple Watch concepts in SwiftUI so product owners and designers could explore features.
- Converted an Angular web app into a cross-platform Capacitor.js mobile app.
- Planned mobile QA strategy with the head of QA; recovered and secured the Apple Developer and Google Play accounts.

Bento Dental — Boston, MA

Jun 2022 – Dec 2022

Mobile Team Lead — owned the mobile app end to end

- Strengthened mobile app security during a SOC 2 audit and maintained HIPAA compliance.
- Identified the signup flow as a key pain point for users and helped redesign it.
- Optimized the Bitrise CI/CD pipeline; managed App Store and Play Store releases.

Quiet Logistics — Devens, MA Apr 2019 – Jun 2022

Senior Software Engineer (promoted from Mobile Applications Developer)

- Shipping subject-matter expert; led shipping engineering through 1M+ packages in 4 months.
- Delivered Brexit compliance changes that recaptured $3M in revenue.
- Helped the company get acquired by American Eagle Outfitters.
- Became the lead engineer when the software manager left at a critical time for the business, keeping essential C#/ASP.NET and SQL systems running.
- Built an Azure CI/CD pipeline for the iOS app and other systems; led the migration to Git; managed the AWS S3 client interface.
- Mentored new engineers and helped the team move to agile development.

NXVTech — Jamaica Plain, MA Sep 2017 – Feb 2019

Software Developer — app to ease tensions between police and communities

- Designed and built a full stack app from customer specs: a React portal, a NoSQL database, and a REST API on Firebase, plus push notifications.

Freelance Developer Aug 2016 – Aug 2017

- Built apps for non-technical clients across multiple platforms, including an AWS-backed iOS notification service; taught clients Git so they could iterate on features faster.

Zobreus — Cambridge, MA Sep 2014 – Jun 2016

- Early-stage health-tech startup connecting care providers and patients; built iOS features in Objective-C and Swift.
